MOHD ZISHAN

Software QA Engineer
Delhi, India | 7011299855 | ansarizishan901@gmail.com | linkedin.com/in/mohd-zishan-7811ab126

PROFESSIONAL SUMMARY

QA Engineer with 4.5+ years of manual testing experience across Web, Mobile, Smart TV, Telecom, and Shopify e-commerce applications. Skilled in functional and regression testing, API testing (Postman), SQL validation, Jira, and Agile Scrum, with working knowledge of Selenium WebDriver, Java, and TestNG for automation. **Immediate joiner** (last working day: 7 August 2026).

CORE COMPETENCIES

Languages: Java, JavaScript, TypeScript

Frameworks: TestNG, Playwright, Selenium, BDD Cucumber, Page Object Model (POM), Cypress, Hybrid Framework

Automation Tools: Selenium WebDriver, Playwright

API Testing: Postman, Rest Assured

DevOps Tools: Jenkins, Git, GitHub, Maven

AI Tools: GitHub Copilot, Claude

Databases: MySQL, SQL Server

Other Skills: Manual Testing, Functional Testing, Regression Testing, Integration Testing, Cross-Browser Testing, Agile, STLC, SDLC, Jira, Defect Reporting, JMeter

PROFESSIONAL EXPERIENCE

Software Quality Assurance Associate | TELUS International *Feb 2022 – 7 Aug 2026*

- Execute 50+ manual test cases per release across functional, regression, smoke, sanity, integration, and end-to-end testing.
- Perform cross-platform testing across Web, Android/iOS, and Smart TV platforms to validate functionality and compatibility.
- Test Shopify e-commerce workflows, including product search, product details, checkout, and order processing.
- Validate product pricing, inventory updates, discount codes, tax calculations, and payment-related scenarios.
- Design and maintain positive, negative, and end-to-end test scenarios to improve test coverage.

QA Intern | TELUS International *Oct 2021 – Feb 2022*

- Executed manual test cases for telecom applications under senior QA guidance, building a foundation in structured test execution.
- Supported smoke, sanity, and regression testing activities ahead of scheduled releases.

KEY PROJECT —

TELUS TV APP | Software Quality Assurance Associate

Domain: Telecom / Streaming | Role: Software Quality Assurance Associate

- Validated core product functionality including live streaming, playback, channel navigation, subscriptions, and DVR recording across supported platforms.
- Verified recording synchronization across multiple devices, directly supporting a consistent cross-device viewing experience for end users.
- Conducted API testing (Postman) and MySQL-based backend validation to confirm data accuracy across streaming and subscription services.
- Maintained structured test cases, execution reports, and defect logs in Jira, giving the team clear release-readiness visibility.

Shopify E-Commerce Platform | Software Quality Assurance Associate

Domain: e-Commerce | Role: Software Quality Assurance Associate

- Tested end-to-end e-commerce workflows covering product search, product details, shopping cart, checkout, payments, and order management.
- Validated product and inventory management, coupon codes, discounts, and tax calculations.
- Designed and executed positive and negative test scenarios for checkout validation, invalid inputs, payment failures, and order processing.

EDUCATION

Bachelor of Technology, Computer Science Engineering Al-Falah University | 2016 – 2020
